

A lot of colleges are buying library books when they should be buying libraries.

When you order your books through the Xerox College Library Program, all you do to set up your library is unpack it.

We can send you the complete 2,000-volume *Choice* Opening Day Collection*, along with 4,500 enrichment titles (including *Choice's* Outstanding Academic Books and 500 out-of-print titles from the ALA booklist, *Books for College Libraries*).

By ordering your library from us, you save yourself the time and trouble of going through hundreds of catalogs and booklists. And you save

your college the expense of having thousands of orders typed up and mailed out.

Every book is listed in one annotated catalog. All of them—or as few as 100—can be had with one order.

And every book comes fully cataloged and processed to LC standards.

If you're about to start a new college library—or add to an existing one—write for the free Xerox College Library Program Catalog.

Then, you'll be able to stop buying your library book by book. And start buying your books by the library.

A new plan to build your newspaper holdings at far below normal microfilm subscription prices!

Start your balanced collection of newspapers on microfilm, or build, inexpensively, on existing collections with the Micro Photo Library Edition Plan . . . an excellent opportunity to receive continuing subscriptions of leading American newspapers on microfilm, specially tailored to meet the needs of libraries, educators and researchers.

We make a long story short by refilming the newspaper to: • delete remake pages • eliminate large advertising sections • save space in tabloid section filming • save cost

And, as a result . . . provide you with a valuable reference and historically complete film copy of these newspapers at far below the individual subscription price charged for a copy of the microfilm as prepared for the publishers' record.

These newspapers are read daily by 8,110,370 people throughout the nation. They should be in your reference files. ACT NOW . . . while the substantial Library Edition savings are in effect.

PACKAGE NO. 2 — SIX COMPLETE LIBRARY EDITION NEWSPAPERS

	Regular Subscription Price	Package Price (all six)
The Wall Street Journal	\$ 75.00

How to find out if your own work is also someone else's.

"At last!"

"At last!"

Some 220,000 doctoral dissertations have been published in this country and Canada during the past 30 years.

This year, an additional 22,000 are expected.

With our centralized store of data on this work, you can prevent your original research from turning out to be unnecessary duplication.

153,000 doctoral dissertations are already on microfilm in our files.

And every year, dissertations from hundreds of universities are added.

Then, key words from the title of each one are programmed into our DATRIX computerized retrieval system. So if you give us the key words that interest you, we can give you a list of all the titles they appear in. (In just a few working days, for example, we can supply you with anything from one title containing "styryltrimethylammonium" to 21,427 with "study".)

In addition, DATRIX will show you where to find an abstract of each of these dd's in *Dissertation Abstracts*, which we publish monthly.

And if you want the dissertations themselves, DATRIX also tells you what it will cost for microfilm or xerographic copies.

You can then get the copies from us for as little as \$3 apiece.

And have other researchers' work lead you to the information you need to finish yours sooner. Or to avoid starting it.

READER IN LIBRARY ADMINISTRATION

edited by
Paul Wasserman
and
Mary Lee Bundy

THIS IS the first in our Reader Series in Library and Information Science. It contains essays not only by specialists in library administration but also by management experts from other fields such as Edward Litchfield, Peter Drucker, Amitai Etzioni, and Herbert Simon.

IT IS not intended to provide solutions or formulae, but rather to present the modern library as a complex organization and to identify the issues which make the role of the administrator an exceedingly difficult one.

THE ESSAYS are arranged under six main headings: introduction to the study of administration, understanding organizational behavior, the search for rationality; management of resources; the struggle for existence; and key issues. Each section is preceded by a statement which introduces the general theme. Individual selections are prefaced by brief comments on the issues treated in the article.

PRICE: \$10.95 plus postage. *Special discount!* If payment is enclosed the price is only \$9.95 and we pay the postage. Hardbound. 403pp.

HAFNER PUBLISHING COMPANY

KAISER, H.

Two Papers on the Limit of Detection of a Complete Analytical Procedure

Introduced by their translator **A. C. Menzies**

x, 61 pages. 1968

\$4.50

The publication of the present text is timely in that it provides the basic knowledge necessary for the understanding of a statistical basis for the definition of limit of detection in a manner suitable for analytical chemists. The translation is preceded by an introductory section by Dr. Menzies that gives a brief revision course in certain aspects of statistics and some background necessary for understanding the latter parts of the text.

PATIL, G. P. and JOSHI, S. W.

A Dictionary and Bibliography of Discrete Distributions

xii, 268 pages. 1968

\$23.95

As the first combined dictionary and bibliography on discrete distributions this work will be of great value to statisticians and mathematicians and indeed to all those whose work involves the use of statistics. Moreover its detailed classification of all the entries and list of references enable the reader to follow up each topic.

SMITH, JOHN

Computer Simulation Models

xi, 112 pages. 1968

paperbound \$4.50

In recent years computer simulation has been widely used to describe and analyse the behaviour of complex dynamic systems of many types. But there are few general accounts of the subject available in book form. In this volume the author has attempted to fill this gap by providing a grounding in the necessary parts of statistical theory; a description of the different types of models that can be constructed; an indication of application areas; and a discussion of practical aspects of model-building. This account has been illustrated by the inclusion of several case studies in which models were actually constructed and run on a computer.
